Re: Computers for Schools

To Whom It May Concern:

I am writing this to you to thank your organization for the support that you give to the Computers for Schools program. I found out about the program in Regina and applied, not knowing if we would qualify for the program.

After a couple of back and forth emails, we received a call that we indeed qualify and there were two computers ready for us to pick up.

When the children returned after school they were thrilled to see the 2 computers and have been busy and happy to use them each day when they return.

Without programs such as these ones, it would not be possible for us to access computers for the children as we are a non profit, charitable organization and funds do not allow us to purchase these kinds of luxuries for our children.

So thank you again from the children and staff of Transcona Park Child Care in Regina. We really appreciated and treasured the computers that we received.

Sincerely:

Lana Hershmilller
Executive Director
